December 13th, 2019 - a chapter on "novel genetic algorithm and particle swarm optimization for data clustering" in Springer book Information Systems Design and Intelligent Applications 2016 ISBN 978 81 322 2750 2 pp 199 208 "Predicting the topology of transmembrane helical proteins

January 14th, 2017 - Helices in membrane spanning regions are more tightly packed than the helices in soluble proteins. Thus we introduce a method that uses a simple scale of burial propensity and a new algorithm to predict transmembrane helical TMH segments and a positive inside rule to predict amino terminal orientation'

January 4th, 2017 - A TMH preference profile is then generated by calculating the average TMH index values along the amino acid sequence using a sliding window of different sizes. Finally a genetic algorithm was employed to refine the prediction by detecting the optimal set of threshold values that separate the TMH segments from non TMH segments'
