# Neurocinematics The Neuroscience Of Film

*Horror Movies Do Something Incredible To Your Brain. Amnesia In The Movies – Neurophilosophy. How Horror Films Use Neuroscience And Psychology To Scare*

## ***Horror Movies Do Something Incredible To Your Brain***

*March 16th, 2016 - That S A Powerful Effect Think Of The Last Time You Jumped Yelped Or Gaspd During A Horror Film Usually When We Re Watching Something We Ve Shut Down The Motor Regions Of The Brain And Yet Those Stimuli From A Shocking Scene Are So Strong That They Overcome The Inhibition To The Motor'*

~~'Amnesia In The Movies – Neurophilosophy March 1st, 2009 – In Her Review Baxendale Examines Common Misconceptions Of Amnesia Found In The Cinema And Suggests That Knowledge Of Them Can Guide Clinicians When Informing Patients And Their Relatives About Diagnoses'~~

**'How horror films use neuroscience and psychology to scare**

October 31st, 2017 - It s October the perfect time for scaring yourself

with a spooky film Some people adore the rush they get from watching

a horror flick others can t stand how filmmakers somehow worm their

way into your consciousness building up tension and then striking that
